

TO THE DISCOVERY OF LANDSCAPES, COLORS AND SCENTS OF THE HILLS

Main protagonists of this tour are the morainic hills of Lake Garda, as well as the countless unpaved trails that wind through forests, meadows, vineyards, orchards and olive groves, following the watercourses secluded from the car traffic, up and down the gentle slopes of the surrounding hills. In addition to the natural beauty of the countryside, tour participants will have the chance to see many animal species, including falcons, hawks, squirrels, hedgehogs, hares, foxes and more. The morainic hills open onto breathtaking views on the gorgeous landscape of Lake Garda and on many other cultural and historical attractions, such as small medieval villages, castles and museums. Along the way, tour participants may also choose to relax and stop for refreshment in one of the many local farms, that produce and sell typical products like wine, cold cuts, cheese, honey, fruit, jam and extra virgin olive oil. The offered tour starts directly from the hotel or apartment where participants are staying, in any of the villages located on the morainic hills South of Lake Garda, lying between Desenzano (at the West end) and Peschiera del Garda (at the East end). Once the e-bikes have been delivered, the tour leader will guide the participants on bike paths within a 10 km radius.
